

Technical Data Sheet

Pop-Up Valve

For 20 & 30 Ltr Blast Machines

Note: Read and follow the Blastline Blast machine operations manual and provide proper training for all users of the device in order to achieve a safe and effective blasting operation.

Description

- Automatic pressure scaling pop-up valve.
- Allows for fast pressurization of blast pot.
- Durable reinforced rubber mushroom head.
- Stem approx 110 mm long and 13 mm external diameter.
- Very hard wearing and long lasting. Fits 20L, 30L blast machine.

Purpose

The blastline internal pop-up valve ensures fast pressurization of blastline blast machines. The automatic pressure scaling pop-up valves are fitted with reinforced metal guards, which makes them incredibly hard-wearing.

Safety

Prevent from causing excessive pressure inside the blast machine. A metering valve is placed on the bottom and pop-up valve on top. When excessive pressure is caused, it automatically releases some pressure and maintains the system at equilibrium.

Parts List

Item	Part no.	Description	Qty
1	PV-30000001	Pop-up valve	1
2	PV-30000002	Plate	1
3	PV-30000003	Tube	1
4	PV-30000004	O ring	1
